What educational materials do teachers share / want?, presentation's plan:

Peer-to-peer websites for teachers exist in both Flanders and French-speaking Belgium. There they can exchange teaching materials with each other. Mediawijs and Média Animation dived into KlasCement.be and e-classe.be respectively to find out which teaching material about disinformation teachers share with each other, which they use a lot and which they like. This analysis gives us an indication of what kind of educational material is desirable or even what teachers really need.
