

# MEDEA Awards 2023

## Press Release

## Submit your entry for the 15th MEDEA Awards edition by 17 March 2023!

The Media & Learning Association's annual competition to reward best use of media to support education at all levels is now open for entries! We are looking for entries which demonstrate **excellent use of multimedia in a learning setting** including videos, audios, simulations, AR/VR/XR apps, podcasts, vlogs, animations, and any other excellent use of educational multimedia. Entries are welcome from students, teachers, schools, production facilities, universities, training companies, agencies, and anyone else working on the creation and use of educational multimedia. **The deadline for receipt of entries is 17 March 2023.**

For 15 years now, the MEDEA Awards has been encouraging innovation and good practice in the use of media in education. These annual awards recognise and promote excellence in the production and pedagogical design of media-rich learning resources and bring to the forefront those producers, designers and teaching staff who provide such inspiration to the entire educational community, particularly in Europe.

MEDEA Awards 2023 finalists will be invited to take part in the **Media & Learning 2023 conference – Where Pedagogy meets Media** organised by the Media & Learning Association and KU Leuven on 7-8 June 2023 in Leuven, Belgium. All finalists' entries will be featured on the conference agenda and the winner will be announced during the Awards Ceremony.
